SUMMARY

AI Product Manager & AI Builder with 3+ years shaping product roadmaps and leading cross-functional teams across drone autonomy, healthcare, and enterprise security SaaS. Proven 0-to-1 builder of AI-native products from LLM-powered workflows and agentic systems to mobile-first features translating ambiguous problems into shipped features with measurable business impact.

SKILLS

- **Product & AI Skills:** Product Roadmapping, Product Strategy, Stakeholder Management, Cross-Functional Leadership, 0-to-1 Product Development, Generative AI & LLM Integration, Prompt Engineering, KPI & Metrics Definition, Agentic Systems
- **AI & Data Tools:** SQL, Tableau, Power BI, Claude/ChatGPT/Grok, Lovable/Emergent/Bolt/Antigravity/Cursor/Windsurf (vibe coding), n8n/Make/Zapier (automation), Warp, CLI
- **Core PM Tools:** Figma, Whimsical, Jira, Softr, Airtable, Microsoft Office
- **Processes:** Product Discovery, User Research, Rapid Prototyping, A/B Testing, Agile Sprints, PRDs, Feature Prioritization, Go-to-Market Strategy

PROFESSIONAL EXPERIENCE

FlytBase (B2B Autonomous Drone SaaS) – Pune, India | Apr 2026 - Present

AI Engineer (Forward Deployed Engineer)

- Owned the 0-to-1 roadmap and end-to-end launch of [Prediq](#), an AI-powered drone maintenance and compliance platform, growing the product to ~\$6K MRR by enabling predictive maintenance, compliance tracking, and fleet health monitoring for enterprise drone operators.
- Cut media ingestion time by ~80% (from ~10 minutes to under 2 minutes per mission) by developing media-upload support with automatic cloud sync for non-docked DJI drones, eliminating manual SD-card retrieval.
- Shipped iOS, Android, and web app fleet management apps with live drone telemetry, AI-powered alerts, and one-tap remote actions (Call Drone to Current Location, Execute Workflow); built and launched a \$50/month premium add-on for an existing enterprise client, opening a new recurring revenue line.
- Cut feature delivery cycles by ~75% by partnering cross-functionally with enterprise stakeholders to clarify ambiguous requirements and orchestrating a multi-agent AI workflow (a Hermes agent coordinating Codex, Claude Code, DeepSeek) across development, research, and QA.

CreliaHealth (B2B SaaS for diagnostic labs and hospitals) – Pune, India | Jan 2024 – Jan 2026

Product Analyst (Associate Product Manager)

- Owned the roadmap and 0-to-1 launch of “[Smart Reports](#),” growing average lab revenue by ~\$2,000 MRR per lab and expanding usage across India, Saudi Arabia, and the UK.
- Reduced key task completion time by ~20% by shipping 50+ mobile-first usability and accessibility enhancements across the [Doctor app](#), [Phlebotomist app](#), and [Patient apps](#) (Android/iPhone/iPad).
- Cut hospital-to-lab sample turnaround time by 18% and unlocked a new revenue stream by leading cross-functional development and rollout of a B2B logistics app.
- Raised AI report-filling accuracy from ~50% to ~90% by redesigning the AI processing pipeline - replacing a single monolithic prompt with field-level prompt engineering (a dedicated prompt per input field, consolidated in a final pass).
- Cut patient registration time by ~58% (from ~2 minutes to 50 seconds) by enhancing the AI-powered TRF scan for faster, lower-error onboarding.
- Resolved 80% of repeat-test ordering inefficiency for US labs by designing a “Picklist” quick-favorites feature to replace slow search-and-add ordering.
- Improved operational efficiency by 15% and cut process errors by 30% by redesigning core LIMS modules (Sample Archival, Org Management).
- Cut support queries by 30% and onboarding time by 25% by building a multilingual (EN/ES) self-service Resource Center.
- Developed and validated MVPs for the Smart Report Template and Report Gallery, informing the broader onboarding-time improvements later scaled through the Resource Center.

Sprinto (B2B SaaS for security compliance and automation) – Remote | Feb 2023 – Nov 2023

Associate Product Manager Intern

- Cut inbound manual issue reports by 30% by designing and launching a “Report Issue” module.
- Accelerated enterprise sales by contributing directly to closing a \$24K ARR client by building [Security Questionnaire](#).
- Cut median response time by 25% by creating a centralized Bug Bounty Hub to improve collaboration among security engineers.
- Reduced compliance failures by 40% by optimizing workflow checks, strengthening audit readiness.
- Cut unauthorized-access risk by ~60% by implementing [RBAC](#) to tighten permission boundaries, helping the team pass SOC2 audits safer.

Nil Barriers (Early-stage edtech startup focused on social inclusion) – Remote | Nov 2022 – Jun 2023

Product Lead

- Validated product-market interest ahead of launch generating 147 waitlist signups within the first week by building and launching the platform's landing page as a pre-launch signal test.
- Shaped a globally-informed MVP feature set for a social-inclusion edtech product by leading structured user research, including 9 live video-call interviews with users across countries including China and Nigeria, to identify the highest-priority features for underserved segments.

EDUCATION

N. L. Dalmia Institute of Management Studies and Research – 2020 – 2022

Post Graduate Diploma, Management, Marketing (Cumulative GPA: 8.58/10.0)

PROJECTS

Hidden Jobs

0-to-1 launch • organic growth • AI/LLM integration

- Built Hidden Jobs, an AI-powered job discovery platform indexing 50,000+ live ATS jobs across 12+ hiring platforms; attracted 600+ monthly sessions, 360+ unique users, and 82.8K Google Search impressions within the first three months.

Stare V2 | Fully-coded platform for aspiring PMs to practice case studies & build portfolios

0-to-1 rebuild • no-code-to-code migration • Product Hunt launch

- Rebuilt (vibe-coded using Lovable & Antigravity) Stare as a fully coded V2, adding AI features and major UX upgrades to replace the no-code MVP.
- Stare V1 - built in 2 days using no-code tools; ranked #6 on Product Hunt; 1,000+ subscribers within 2 months across 63 countries (ARR \$120).

The Interview Panel

Agentic AI systems • LLM-based evaluation

- Built The Interview Panel, an AI-powered interview platform that conducts adaptive technical and behavioral interviews, asks contextual follow-up questions, evaluates candidate responses, and generates structured hiring reports using LLM-based interview agents.

Elite PM

Co-founded • AI-powered career platform • partnership with Microsoft PM

- Co-founded and launched Elite PM, an AI-powered career platform for aspiring Product Managers, with a Microsoft Product Manager as co-owner, featuring AI mentors, mock interviews, resume reviews, and personalized learning paths.

Networking Sheet 2.0 | Networking platform built for Product Con attendees to connect and collaborate

Rapid MVP • high-concurrency collaboration • adopted by host platform

- Built as an MVP for Product Con (Product School); reached 1,300 unique users on Day 1 with up to 150 members editing concurrently per live session later integrated directly into Product Con's own platform.
